DETAILED ACTION

1. Claims 1-26 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-5, 7-14, 16-23 and 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,002,871 to Duggan et al. (Duggan).
- 4. **Regarding Claims 1, 9 and 18:** Duggan discloses:

providing a test application that satisfies reentrancy requirements (col. 21, lines 57-61 'Each session is ... reentrant') on a client (col. 5, lines 18-21 'the test tool ... runs on a single computer'); and

instantiating a plurality of instances of the test application using threads (col. 21, lines 57-61 'Each session is executed as a separate thread'), wherein the instantiating and execution of each of the plurality of instances of the test application occur within a single process (col. 21, lines 53-57 'The basic module 12 is also responsible for initiating multiple, concurrent sessions'; col. 21, lines 57-61 "It is the multi-threaded, reentrant nature of the test tool program code").

Application/Control Number: 10/670,898

Art Unit: 2193

5. **Regarding Claim 2:** The rejection of claim 1 is incorporated; further Duggan discloses:

Page 3

identifying application protocol interfaces (APIs) associated with the test application prior to the instantiating step (col. 12, lines 21-23 'A list box 272 contains a list of all of the commands in the command module created for testing a given application program'); and

providing a test script capable of invoking the APIs (col. 13, lines 59-62 'a test operator [can] create test scripts containing ... command module commands'), wherein upon execution, the test script instantiates the plurality of instances of the test application (col. 5, line 67-col. 6, line 3 'the test tool program executes multiple concurrent sessions') using threads (col. 21, lines 57-61 'Each session is executed as a separate thread') within the single process (col. 21, lines 53-57 'The basic module 12 is also responsible for initiating multiple, concurrent sessions'; col. 21, lines 57 "It is the multi-threaded, reentrant nature of the test tool program code").

- 6. **Regarding Claims 3, 14 and 23:** The rejection of claims 1, 9 and 18 are incorporated respectively, further; Duggan discloses the server application is a network application (col. 5, lines 9-12 'a test tool for testing application programs ... over a network').
- 7. **Regarding Claims 4, 12 and 21:** The rejection of claims 1, 9 and 18 are incorporated respectively, further; Duggan discloses the reentrancy requirements

Application/Control Number: 10/670,898 Page 4

Art Unit: 2193

dictates that the plurality of instances of the test application be run within the single process without interfering with each other (col. 21, lines 57-61 'reentrant nature of the test tool').

- 8. Regarding Claims 5, 13 and 22: The rejection of claims 1, 9 and 18 are incorporated respectively, further; Duggan discloses each of the plurality of instances of the test application corresponds to a separate thread (col. 21, lines 57-61 'Each session is executed as a separate thread'), and wherein each of the separate threads is associated with a different connection to the server (col. 5, line 66-col. 6, line 3 'A "session" refers to the execution of one test script, on one client connection').
- 9. **Regarding Claims 7, 16 and 25:** The rejection of claims 1, 9 and 18 are incorporated respectively, further; Duggan discloses the plurality of instances of the test application simulate use of the server application by a plurality of users (col. 6, lines 47-51 'the test tool program ... is capable of executing test scripts ... based on a user list').
- 10. **Regarding Claims 8, 17 and 26:** The method of claim 1, 9 and 18 further comprising collecting data corresponding to the test (col. 8, lines 4-6 'The test tool program ... provides four options for logging information').
- 11. **Regarding Claims 10 and 19:** The rejection of claims 10, and 19 are incorporated respectively, further; Duggan discloses an interface identification system

Art Unit: 2193

for identifying application protocol interfaces (APIs) associated with the test application (col. 12, lines 21-23 'A list box 272 contains a list of all of the commands in the command module created for testing a given application program').

12. **Regarding Claims 11 and 20:** The rejection of claims 10, and 19 are incorporated respectively, further; Duggan discloses the test application instantiation system comprises a driver that executes a test script capable of invoking the identified APIs (col. 13, lines 59-62 'a test operator [can] create test scripts containing ... command module commands), and wherein upon execution, the test script instantiates the plurality of instances of the test application (col. 5, line 67-col. 6, line 3 'the test tool program executes multiple concurrent sessions') using threads (col. 21, lines 57-61 'Each session is executed as a separate thread') within the single process (col. 21, lines 53-57 'The basic module 12 is also responsible for initiating multiple, concurrent sessions').

Claim Rejections - 35 USC § 103

- 13. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/670,898

Art Unit: 2193

- 14. Claims 6, 15 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,002,871 to Duggan et al. (Duggan) in view of "The Javatm Virtual Machine Specification" by Lindholm et al (Lindholm).
- 15. **Regarding Claims 6, 15 and 24:** The rejection of claims 1, 9 and 18 are incorporated respectively, further; Duggan does not disclose the process comprises a JAVA virtual machine.
- 16. Lindholm teaches that JAVA programs, which run on a JAVA virtual machine were well known at the time of the invention, and that JAVA programs and the JVM provided benefits known to those of ordinary skill in the art.
- 17. It would have been obvious to a person of ordinary skill in the art at the time of the invention to implement Duggan's 'test tool' and 'basic module' in the JAVA programming language and execute them on a JVM.

Conclusion

18. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Mitchell whose telephone number is (571) 272-

Application/Control Number: 10/670,898

Art Unit: 2193

3728. The examiner can normally be reached on Monday-Thursday and alternate

Fridays 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
